## Bentz Chambered For Improved Accuracy

Heavy contour, premium-grade "Bentz" chambered .22 LR barrel provides an immediate improvement in accuracy over your original factory barrel. Close-tolerance Bentz chamber combines the accuracy of a match grade chamber with the reliable cycling of a standard factory chamber. Extra-heavy, untapered .920" O.D. provides maximum stability for greater shot-to-shot consistency. Use with standard or match grade ammunition; not for use with CCI Stinger ammunition. Minor fitting to stock may be required. Chrome-moly models have blue finish and are available in an 18" length with dished crown or a 16 1/2" length with 1/2"-28 tpi threaded muzzle for adding a compensator. Stainless model available in smooth 18" long barrel or patented helical fluting for greater heat dissipation, less weight, and improved barrel harmonics. Both have dished crown. SPECS: 4140 chrome-moly steel blued, or 416 stainless steel (SS), natural matte finish. .920" (2.34cm) O.D. 18" long (45.7cm). Blued barrel w/threaded muzzle - 16?" (42cm) long. ?"-28 tpi thread.
