

CONDITION ONE ANTI-CANT DEVICE - BADGER ORDNANCE

CONDITION ONE ANTI-CANT DEVICE BLACK

[Optics & Mounting](#) > [Optic Accessories](#) > [Scope Anti-Cant Devices](#)

The C1 ACD is a leveling instrument designed for the C1 line of mounts to ensure that the weapon system is level before a shot is taken. It can be mounted on any C1 mount left/right fore/aft. It can be used in conjunction with and opposing other accessories or alone on the mount utilizing the provided standalone puck. The Level itself can be user calibrated to ensure that it is properly aligned to the user's scope/weapon system. The level is made from a 3/4" glass vial and filled with a ceramic BB as opposed to an air bubble to ensure better accuracy and quicker response at different temperatures and pressures. The C1 ACD housing also allows the end user to attach a commonly procured tritium vial (not included with or sold by Badger Ordnance) to the level for use during low light/no light operation. 7075 T6 Aluminum, Mil Spec Type III Hardcoat Anodized, tan or black. Weight .63 oz.

CONDITION ONE ANTICANT DEVICE USER SAFETY INSTRUCTIONS

Introduction

Thank you for choosing the CONDITION ONE ANTICANT DEVICE (C1 ACD). This device is designed to enhance the accuracy of your weapon system by ensuring it is level before taking a shot. To ensure your safety and the proper use of this product, please read and follow these guidelines carefully.

General Safety Guidelines

- Always ensure that the C1 ACD is properly calibrated before use.
- Use the device in accordance with the manufacturer's instructions to avoid potential hazards.
- Keep the device out of reach of children and vulnerable individuals.
- Regularly inspect the device for any signs of damage or wear before each use.
- Report any unsafe conditions or incidents to the relevant authorities.

Specific Safety Precautions for Use

- Do not use the C1 ACD if it shows signs of damage.
- Ensure that the device is securely attached to the mount before use.
- Avoid using the device in extreme temperatures or weather conditions that may affect its performance.
- Be cautious when handling the glass vial; it is fragile and may break if dropped.
- When using the tritium vial (not included), ensure it is properly secured and handled according to safety guidelines for radioactive materials.

Instructions for Installation and Usage

1. Calibration:

- Before attaching the C1 ACD, calibrate the level according to the manufacturer's instructions.
- Ensure the level aligns with your scope or weapon system.

2. Mounting:

- Attach the C1 ACD to any C1 mount in the desired position (left/right, fore/aft).
- If using the standalone puck, ensure it is securely attached to the mount.

3. Usage:

- Check the level before taking a shot to confirm that the weapon system is level.
- If using a tritium vial, ensure it is securely attached for low light/no light operations.

4. PostUse Care:

- After use, remove the C1 ACD from the mount and store it in a safe, dry place.
- Regularly clean the device with a soft cloth to maintain visibility and performance.

Disposal Instructions

- Dispose of the C1 ACD according to local regulations for electronic waste.
- If the glass vial is broken, handle it with care to avoid injury. Dispose of it in a punctureproof container.
- Ensure that any tritium vials are disposed of in accordance with local regulations for hazardous materials.

Contact Information for Further Support

For any questions regarding the use, safety, or maintenance of the CONDITION ONE ANTICANT DEVICE, please contact the manufacturer or your local distributor. Ensure that you have the product details on hand for quicker assistance.

Thank you for your attention to these safety instructions. Enjoy using your CONDITION ONE ANTICANT DEVICE responsibly and safely.
