The next evolution in Pistol Caliber Carbine recoil control has finally arrived. The VG6 EPSILON 9mm sets a new standard when it comes to recoil management by virtually eliminating any muzzle movement. This combination muzzle brake / compensator / flash hider is matched only by the amazing look of this device. The VG6 Epsilon 9mm carries many of the same characteristics that have made its higher-pressure cousin a runaway success. Three extended flash hiding prongs help minimize muzzle flash providing the operator an uninhibited view through optics or sights while porting design has been optimized for the pressures of 9mm. We have created a muzzle device that produces very soft, low-energy recoil that allows for quick, precise follow-up shots.
