As Defiance continues to innovate and find new ways to better serve our customers, we have pushed the envelope again. The anTi X is an ultra-lightweight action with integral scope mounts and recoil lug that shares the same guaranteed head-space measurement as our Ruckus, Tenacity, and anTi custom precision rifle actions. Using pre-hardened 416R stainless for the receiver and a 4340 chrome moly bolt, gives customers the smoothness, reliability and longevity that they have come to expect from Defiance. Innovative weight reduction. Premium Materials. No compromises. All material pre-hardened prior to machining to prevent changing tolerances during heat treat. Bolt machined from one piece of pre-hardened 4340 chrome moly in one operation enabling guaranteed headspace +/- .001?. Receiver machined from one piece of pre-hardened 416SS. Wire EDM-cut, full-length lug ways with anti-bind result in smooth bolt operation. Primary extraction design significantly increases initial extraction and ensures smooth bolt cycling.
