Sometimes, using polymer to construct reliable magazines just isn't possible. In cases where physics precludes polymer, Magpul's new alloy magazines (AMAGs) are built with the same quality and dependability standards that you'd expect out of a PMAG. The AMAG 15 SG9 is a 15-round 9mm magazine made for SIG P320 Compact handguns, and it features a stainless-steel body with polymer sub-components. The AMAG 15 SG9 includes many of our advancements in magazine design. This includes a high-visibility, controlled-tilt follower for precision feeding of every round. The stainless-steel spring is corrosion-resistant and maintains the exact required tension for repeated loading and firing. The rugged, flared floorplate is easily removable for cleaning and routine maintenance. Visually, the capacity-indicator windows begin at five (5) rounds and continue along the spine of the magazine in one (1)-round increments, and the paint-pen dot matrix allows custom marking to provide quick ID of magazine loads and use. FEATURES Made in the USA. Corrosion-resistant, stainless-steel magazine body High-visibility, controlled-tilt follower Stainless-steel spring for longevity and durability Flared, easily removable floorplate for easy maintenance Capacity indicators starting at 5 rounds, continue in 1-round intervals Paint-pen dot matrix Compatible with all P320 Compact frames
