

# Delta Series Pic Rail Riser - Delta Series Pic Rail Riser 1"

[Optics & Mounting](#) > [Rings, Mounts & Bases](#) > [Rifle Bases](#)

Wheeler® understands the need for precision in today's world of advanced shooting systems. Calculating total optic height above a receiver rail is difficult due to varying specifications from a variety of ring manufacturers. The necessity to mount optics and accessories at a precise height above a Picatinny rail led us to the development of Multi-Height Pic Rails. Being able to select a riser that fits the particular application allows for the perfect co-witness alignment of a scope and forward mounted Night Vision Devise (NVD). Proper alignment of the scope with the NVD is critical in maintaining the same zero point with a day/night system.
